Certificate of Analysis

HCG CHORIOMON 5000 IU / 1 mL

Cat. No:	ONX-HCG-5000-PEN
CAS No:	9002-61-3
PubChem CID	Not available
Chemical Name:	Human Chorionic Gonadotropin (HCG / Chorionic Gonadotrophin)
Strength:	5000 IU / 1 mL

PHYSICAL AND CHEMICAL PROPERTIES

Molecular Formula:	Not applicable — heterogeneous glycosylated protein
Molecular Weight:	Approx. 36 kDa (glycosylation-dependent)
Storage:	Store below 25°C. Protect from light. Use immediately after reconstitution.
Chemical Structure:	Heterodimeric glycoprotein consisting of an α-subunit (92 amino acids) and a β-subunit (145 amino acids), non-covalently associated and glycosylated.

ANALYTICAL DATA

Test Items	Specifications	Results
Appearance	Reconstituted solution: clear and colourless	Batch result required
Potency	80.0–125.0% of stated potency	Batch result required
Identity (LC-MS)	Conforms to Human Chorionic Gonadotropin reference	Batch result required

Conclusion: Final batch release is subject to confirmation of analytical results against the stated specifications.

Caution: Product has not been fully validated for medical applications. For research use only.
